

Empowering regional ecosystems for climate resilience: RESIST Community of Interest

2ND December 2025

10.00-12.00

Online | Microsoft Teams

2 December 2025, 10:00-12:00 | Microsoft Teams

Building climate resilience requires collaboration across public authorities, businesses, research institutions, and citizens. Regions and communities play a pivotal role in leading place-based innovative solutions that anticipate and adapt to climate impacts.

This webinar takes place at a key moment, as the EU Missions are being evaluated and their real impact on the ground is being assessed. It will showcase how the EU Mission on Adaptation to Climate Change supports the regional ecosystems in developing concrete strategies and innovative pathways, and explore how regional and local ecosystems are working together to co-design, test, and implement climate resilience solutions.

Participants will have the chance to share experiences, challenges, and good practices, and to reflect together on what makes ecosystem collaboration effective in practice. Through interactive sessions and structured discussions, regions can learn from each other's approaches, identify obstacles, and explore solutions.

Agenda

When	What
10.00-10.10	RESIST in Action – Building Climate Resilience Through Quadruple Helix Collaboration
10.10-10.40	Stories from the Regions: Southwest Finland and Centro Portugal
10.40 - 11.10	Q&A session and Mentimeter
11.10-11.25	Guiding Regions through the Regional Resilience Journey and Adaptation Investment Cycle Pathways2Resilience
11.25 - 11.40	Strengthening Regional Capacities through Mission Support and Knowledge Sharing REGILIENCE
11.40 - 11.50	RESIST stories and handbook REVOLVE
11.50 - 12.00	Wrap up and what is coming next for RESIST
